

Knowing exactly which profile is suitable for your track can sometimes be a challenge. The technical tables below show the range of rail products and grades we manufacture.

Available in lengths of up to 120m (216m welded), these can be precisely matched to track conditions, track types, environmental conditions and a host of other variables to ensure that every rail we deliver provides the best performance throughout its service life.

Other rail profiles and grades may be available – please contact us to discuss your requirements.

Additional processing for corrosion protection

For aggressive track conditions, our rail can also be coated to provide superior durability and corrosion protection – please contact us to discuss your Zinoco® requirements.
